APPLICATIONS OF METABOX

Metabox serves as a pivotal asset for enhancing communication, collaboration, and interactive presentations. This device caters to the unique needs of professionals across various industries, delivering a transformative and engaging holographic experience

METABOX

meet your audience

everyday, everywhere.

Communication

Virtual Meetings: Attend multiple meetings simultaneously, saving time and money.

Conferences & Events: Host events without the need for physical travel, reducing CO2 emissions.

Marketing & Retail

Experiential Marketing: Engage audiences with interactive ads and pre-recorded content.

Retail Promotion: Showcase products dynamically across multiple locations.

METABOX®

Education

Remote Teaching: Connect with teachers and students worldwide, enabling simultaneous classes and institutes.

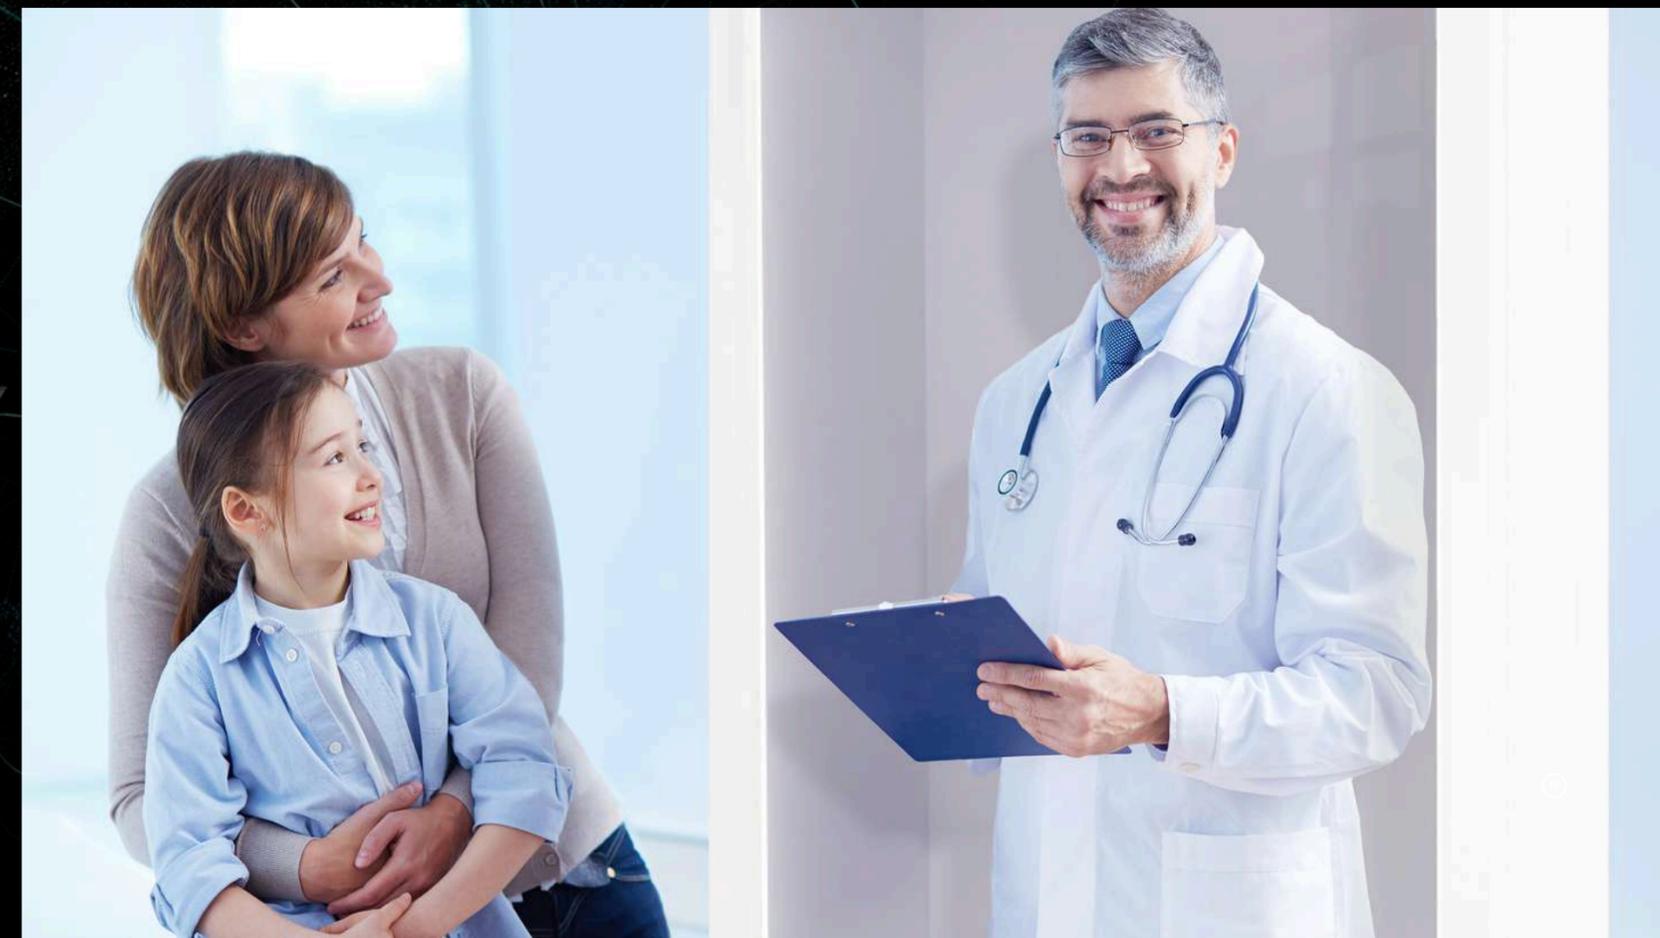

Interactive Learning: Enhance the quality of education with virtual presence.

Healthcare

Telemedicine: Provide real-time, holographic consultations, bringing doctors closer to patients.

Surgical Training: Simulate surgeries and medical procedures for training purposes.

METABOX[®]

Entertainment

Live Events: Host concerts, shows, and performances with holographic artists.

Broadcasting: Feature virtual hosts and guests on TV shows and live broadcasts.

Corporate

Training & Development: Conduct interactive training sessions and workshops.

Product Launches: Unveil new products with dynamic, 3D presentations.

Remote Collaboration: Facilitate global teamwork with holographic presence.

METABOX®

Art & Museums

Exhibitions: Showcase digital replicas of artworks and historical artifacts.

Interactive Displays: Create engaging museum experiences with holographic guides and exhibits.

Tourism

Virtual Tours: Provide tourists with immersive, holographic tours of landmarks and destinations.

Travel Experiences: Enhance travel marketing with dynamic, 3D promotional content.

METABOX®

WHY ITS **UNIQUE**

Metabox revolutionizes holographic communication through three core strengths: **lightning-fast AI responses**, a seamless blend of aesthetics and functionality in design, and **unparalleled scalability** tailored for B2B and B2C needs.

SWIFT AI RESPONSE

Unrivaled patented AI software ensures instant interactions, elevating user experience.

DESIGNED IN ITALY

Seamlessly blends aesthetics with functionality, enhancing user engagement.

SCALABLE B2B SOLUTIONS

Modular design for adaptable, bespoke solutions, catering to diverse business requirements

FUTURE-PROOF TECHNOLOGY

Positioned at the forefront of innovation, Metabox evolves with emerging holographic trends, securing long-term relevance.

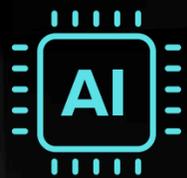

Metabox Mini is the compact tabletop version of our groundbreaking holographic communication device, leveraging **advanced AI implementation**. This portable device generates scaled-down volumetric holograms, making it ideal for personal or small-group interactions.

The integration of AI technology in Metabox Mini further enhances the immersive communication experience, making it a versatile and powerful tool for various consumer segments, including private individuals, art enthusiasts, and collectors.

DIGITAL HUMANS

REDEFINING DIGITAL PRESENCE WITH METABOX

Transforming AI into **Human Experience**

Imagine having a conversation with a lifelike digital human who understands and responds to your needs, providing a seamless and natural interaction experience.

METABOX[®]

Listen, Think, Respond.

Our Digital Humans revolutionizes communication by seamlessly integrating real-time listening, thinking, and responding capabilities.

METABOX[®]

What are **Digital Humans**?

Digital Humans are AI-powered avatars that appear as hyper-realistic, volumetric holograms. They interact with users, providing a seamless and natural conversational experience.

METABOX[®]

Advantages of Digital Humans

Realism: Hyper-realistic avatars create a lifelike interaction experience.

Accessibility: Make advanced AI technology accessible to everyone.

Cost-Efficiency: Reduce travel and operational costs.

Scalability: Deploy Digital Humans across multiple platforms and devices.

Enhanced Engagement: Improve customer experience with interactive and engaging digital avatars.

CASE STUDIES

EUROPEAN SPACE AGENCY (ESA)

Since partnering with the European Space Agency (ESA) in 2021, Metabox has been used at the Italian base station for real-time holographic appearances of astronauts and scientists.

This has significantly boosted public engagement and education through innovative edutainment applications. The collaboration continues to show promising results.

MEDIASET

Since 2022, Metabox has been integrated into two immensely popular Italian TV shows, Grande Fratello and Tu si Que Vales. This integration has enriched the viewer experience with dynamic holographic elements, resulting in increased viewer engagement and higher show ratings.

The continued use of Metabox in these flagship programs underscores its success in enhancing television entertainment.

In collaboration with Microsoft, we created Matteo Fiamma, the first holographic Digital Human of a Guardia di Finanza officer, to celebrate the 250th anniversary of the Guardia di Finanza.

Unveiled in Rome's Piazza del Popolo, Matteo Fiamma captivated the audience with his lifelike presence and interactivity.

This innovative project showcased Metabox's ability to blend advanced AI with cultural significance, making a memorable impact on public engagement and setting a new standard for future applications.

Step into the **Future**

With Metabox and Digital Humans, you can revolutionize how your business interacts with customers, partners, and employees, positioning yourself as a leader in the AI-driven digital landscape.
